

NJORD Estonia: NJORD's contribution to The Legal 500: TMT 3rd Edition Country Comparative Guide 2019

NJORD Law Firm IT attorneys Liisi Jürgen and Silja Elunurm made an exclusive contribution to The Legal 500: Technology, Media and Telecom (TMT) Country Comparative Guide 2019. It is accessible online now.

NJORD experts highlighted that autonomous vehicles and other products or services based on artificial intelligence (AI), cryptocurrencies and surrounding AML topics, the use 5G network and IoT and the implementation of big data by the government for optimizing state management will be some of the upcoming technology-related topics that need, in some extent, regulatory changes in Estonia.
