

Quarterly Update May 2020

Every week NJORD Law Firm's Maritime and Transport Law Team publish short relevant news about Danish Maritime and Transport Law. This quarterly update summarises the key legal decisions and trends for the transport industry in the first quarter of 2020.

In this quarterly update, we obviously focus on the crisis created by COVID-19, which significantly has impacted the world in which we live. Furthermore, you can read about the significant fines that are imposed on violators of the Road User Charge Act - here, in particular, we ask the question of whether the penalties are also passed correctly.
